CHEMICAL PROTECTION. SIMPLIFIED.

AnsellGUARDIAN Chemical simplifies the glove and suit selection for your unique set of chemicals.

WHAT WE DO

AnsellGUARDIAN Chemical evaluates the resistance of glove and suit materials to your chemicals and delivers a personalized assessment with expected permeation breakthrough times and degradation ratings.

This assessment can either be carried out during a personal consultation with our AnsellGUARDIAN safety expert, or online by using our chemical resistance database (ansellguardianpartner.com). As a result, selecting the right chemical glove and/or suit has never been easier.

HOW WE DO IT

We report permeation breakthrough times –BT1.0 and BT0.1 taken in minutes for the challenged chemical to permeate through the material at a rate of 1.0 µg/ cm²/min or 0.1 µg/ cm²/min as per EN374-3, EN 16523-1, ISO 6529 and ASTM F739. We also report degradation ratings for HP.

Our online solution is designed to simplify your selection of Ansell hand and body protection solutions. It offers an instant visual evaluation and an easy-to-use search functionality, including the unique Chemical Abstracts Service (CAS) number system on ansellguardianpartner.com.
